## Company Profile

Neurélux is an innovative light-based PBM device that improves brain blood circulation and cognitive balance. As a dual-therapy stand combining lighting and neural wellness, it brings preventive brain care naturally into daily life.

## Company Competitiveness

### Light-Based Brain Wellness Innovation

- Neurélux integrates lighting and PBM therapy into one dual-therapy stand, delivering brain wellness through light.
- Using dual IR wavelengths, it improves cerebral blood circulation and supports cognitive balance naturally and safely.

### Everyday Accessibility

- Designed as a familiar floor-stand lamp, Neurélux blends easily into homes and workplaces.
- Enables preventive brain care without medical procedures — turning daily lighting into therapy.

### Trusted Technology

- Developed by KOREA Lighting, a pioneer in LED heat control innovation with its proprietary HS FRAME™ platform.
- Ensures stable, high-efficiency performance ideal for continuous, comfortable use.

## Key Product

### Neurélux

Neurélux is a dual-therapy stand combining lighting and PBM technology.

- Utilizes dual IR wavelengths to enhance brain circulation and cognitive health.
- Powered by HS FRAME™ platform for precise wavelength stability with no heat buildup.
- Functions as both a stylish lamp and a daily brain wellness device.
- Brings medical-grade light therapy into everyday life.
